

*"I've been using Earthworks Replenish 5-4-5 on my tees for the last two seasons and I've seen a dramatic improvement on our turf performance. We see its value especially during summer stress and it has allowed us to significantly reduce our hand watering. Replenish 5-4-5 is a great foundation product that delivers a nice steady feed through the growing season. I'm looking forward to use it on fairways this year."*

*-Brian Youell, Master Superintendent

# EarthWorks AERIFICATION PROGRAM

## APPLICATION RATES:

**Replenish 10-2-5**  
5 lbs/1000  
1 week prior to aeration

**Replenish 5-4-5**  
10 lbs/1000  
at aeration

Quick Recovery • Deep Root Establishment • Improves Soil Drainage • Helps to Reduce Salt Damage • Remineralizes Soils

## Replenish 10-2-5 & Replenish 5-4-5

**Replenish 10-2-5** at 5 lbs/1000 ft<sup>2</sup> 1 week prior to aeration will speed the healing process while providing the soil with the necessary carbon that allows the microbial population to flourish. Benefits from a healthy microbiome will be realized in lower disease incidence, improved moisture management, and more efficient nutrient utilization.

**Replenish 5-4-5** applied at 10 lbs/1000 ft<sup>2</sup> during aeration will provide the nutrients necessary for quick recovery, while delivering the extended benefit of an enhanced microbial population, deeper rooting and improved water efficiency. Apply days before, during or immediately after aerification. May also be used in conjunction with the DryJect process.
