

Carbon Based Fertility Lawn Care Program

A cost effective way to keep lawns strong all year long

Building healthy soils and plants starts with carbon and one of the best and most cost effective ways to approach this is to apply the Replenish granular fertilizers. The Replenish line of products boast a powerful combination of bio active carbon from mineral rich composted poultry liter alongside Nitrogen, Phosphorus, Potassium and available Calcium.

SPRING

Replenish 8-2-2

- Quick green-up
- Jump start biology
- Summer stress reduction

SUMMER

Replenish 5-4-5

- Low Salt Input
- Increased density, color, and vigor

Sea 3

- Feed soil biology
- Reduce plant stress

FALL

Replenish 10-2-5 or Replenish 8-2-2

- Recover and Replenish
- Feed the soil and the plant

AERIFICATION

Renovate Plus & Myco-Replenish 3-3-3

- Deep root establishment
- Improve soil drainage
- Reduce salt damage
- Re-mineralize soils

SEEDING/ SODDING & ESTABLISHMENT

Renovate Plus and Myco-Replenish 3-3-3

- Grow Roots!!

A Deeper Respect
